

SSCE3V311N7

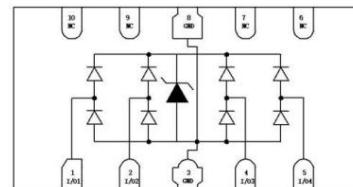

Ultra Low Capacitance Array for ESD Protection

● Description

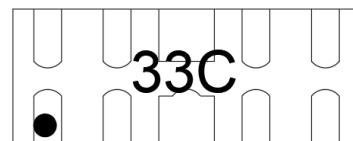

The SSCE3V311N7 provides a typical line to line capacitance of 0.3pF between I/O pins and low insertion loss up to 3.0GHz providing greater signal integrity making it ideally suited for HDMI applications, such as Digital TVs, DVD players, Computing, set-top boxes and MDDI applications in mobile computing devices.

It has been specifically designed to protect sensitive components which are connected to high-speed data and transmission lines from overvoltage caused by ESD(electrostatic discharge), CDE(Cable Discharge Events),and EFT (electrical fast transients).
